3. Summary report
4. Main Results:

- the issue exists in all the partnership countries
- different countries have different levels of awareness and reaction to it
- it is hard to access specific data on violence against elderly women
- most countries frame it within domestic violence and/or gender equality laws
- NGOs/non-profit organizations are the main providers of services/and studies
- Most countries have public and private organizations providing services for victims of violence in general or female victims but not particularly elderly women.
- specific data focused on this matter is rare; more data needed
